

I thought of comparing variety of English
& German Birds after p 1216

There is very little information except of
experience, about fertility of the crossed
canary-birds =

- 239 Hybrids of Canary & 7 specimens always taken after taken in colony & 100% (2)
- 242 good breeders have amongst Canaries
- 247 h. Birds passed for next, with very little to do with with Canaries (2)
- 248 between the Hybrids Canaries & full blooded birds not breed with each other [but first group are weak] (2)
- 247 H. themselves up to Bull-finch & Canaries (h. 2)
- 252 Canaries sing to the full themselves.
- 262 small case of Birds in dark place long brilliancy of colour. (Ch 7) h. 308^h
- 289 German bird 12 years (2 for 10 years)
- 293 fine quality of 4 years 9 months can be distinguished - probably do not mix (P. Buckley)
- 312 brighten pale once extremely dark do not sing (than 10 years)
- 318 brighten pale sometimes breed in eggs surrounded & green bright
- 319 live to 15 years old - the 25 years
- 322 brighten pale & 100% (2) downy singers, 100% are brighten pale, unlike
- 403 (Red Blue) mixture (Canaries & birds) But very nothing in families of Hybrids
